EXPERIENCE

Freelance Web Developer & Advocate   Dec 2022 – Present

- Collaborated with local small businesses and non-profits to develop full-stack web applications, customizing components and APIs to meet their unique needs and deliver sustainable solutions.
- Utilized a range of technologies including React, Sass, Tailwind CSS, SQL, Sanity.io, SEO, and Rest & GraphQL APIs to create these applications and ensure optimal user experience and performance.
- Demonstrated commitment to education and professional growth by creating and sharing tutorials on open-source fundamentals, Git, and basic DevOps, contributing to the development of a vibrant and supportive tech community.

CounterTrade Products, Inc – Arvada, CO   Jun 2023 – Aug 2023
Jr Software Developer

- Designed and implemented SQL reports for financial and operational analysis, providing actionable insights and supporting data-driven decision-making.
- Participated in architecture and implementation planning of data-driven desktop form and website development projects using ASP.NET and its associated technologies, including AJAX, C#, VB, JavaScript, JQuery, CSS, HTML, SQL, NoSQL, MySQL, and SOAP/XML web services.
- Assisted in resolving system test and production release issues, identifying and addressing bugs or errors promptly to ensure smooth operation of software applications.

Glowstik – Denver, CO   October 2022 – December 2022
Jr Software Developer

- Converted a startup concept into an operational, responsive React.js app with technologies like Lottie and CSS-in-JS libraries, achieving an impeccable user experience and peak performance.
- Enabled seamless code integration and troubleshooting within the development team, maintaining elevated coding standards. Resulted in uninterrupted software performance, fostering effective communication and optimized outcomes.
- Aligned with start-up founders to outline investor-friendly milestones, driving actionable progress. Delivered the 75% complete Minimum Viable Product (MVP) presentation, effectively articulating the project's technical nuances with clarity and precision.

City of Aurora – Aurora, CO   July 2017 – July 2020, May 2022 – October 2022
Computer Instructor/Clerical Assistant/Museum Visitor Services Manager

- Taught Intro Web Design, MS Office, & Computer Basics to students of all levels in classes of 10+. Set goals to improve student knowledge to 80% or more of core concepts & created learning plans specific to students' needs.
- Improved structure and redundances in existing visitor data and created new procedures that cut data collection time by 80%. Introduced staff to data collection templates on Google & Microsoft.
- Created check-in application using Microsoft PowerApps and Google AppSheet templates and exported data to various tables and forms within both Microsoft and Google suites.
